

## Chain of Events

Listen and watch for all the things in the disaster that influenced

the outcome. Write keywords and main ideas. What recommendations would you make as lead investigator to avoid or mitigate the impact of a future disaster else like this?

| Environmental Factors | Human Factors                 | Equipment Factors |
|-----------------------|-------------------------------|-------------------|
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
|                       |                               |                   |
