

Electronic Mihi Banner Exemplar for Pupil Portfolio or Profile

Click on Pages.. choose preferences.. change ruler to centimetres

This is the banner shape before I filled it.

This is "Achieved" as it has major design flaws. Can you spot them?

This is "Expert" as it shows excellence in design.

This is a bigger version.. not correct size

- Create a shape 12cm x 1 cm (this is about 70 pixels high, 1 pixel= dot on screen)
- Use text tools (Comic Life), Instant Alpha, Masking, back and front tools to create your montage.
- Banner must have your: mountain, river, parents/caregivers names. This is because a Mihi represents where you come from. Rivers and mountains are natural landscape features that are relatively permanent, cities can change tremendously over time but rivers and mountains tend to be still in the same place!
- Other things: Symbols of items that you connect with, have deeper meaning with you e.. of N.Z., groups you belong to, other places special to you (holiday home) and of things you are passionate about (sports, culture, music, role-models).... try not to have things you just like e.g, KFC

Use the ruler in the "Inspector" to create the exact size.
